

Certificate III in Information Technology

ICT30120

A HANDS-ON PRACTICAL COURSE TO START YOUR IT CAREER

The Certificate III in Information Technology is a hands-on qualification that has a key focus on the skills and knowledge essential for any IT career. You will learn all the essential skills for a successful career in IT including how to run standard diagnostic tests, install and optimise operating system software and manage the migration to newer technology.

This Certificate III program takes advantage of the latest advances in virtual technology to safely transfer IT theory to practical application. Our students will have the opportunity to develop new skills or hone their existing IT abilities using a virtual laboratory specifically designed to provide a realistic IT experience. This means our learners can practice and experiment in a safe setting with no risk to operational systems or networks in the workplace.

Customise Your Course
