

Certificate III in Supply Chain Operations

TLI30321

COMPREHENSIVE SUPPLY CHAIN
SKILLS AND KNOWLEDGE

About This Course

This qualification covers the essential knowledge and skills to work and succeed in a supply chain role in an office environment (versus Warehouse based roles). Our subjects cover such crucial topics as: records for logistics operations; purchasing and procurement sustainability in logistics. Critical communication skills are covered in-depth to ensure that learners can work effectively with colleagues and customers. This program specifically addresses legal current obligations under Workplace Health and Safety, Chain of Responsibility and Fatigue Management laws in a practical and engaging way.

Supply Chain operations is a growth area across retail, online shopping and commercial fields. With a variety of roles that are likely to be always available to those with experience in the field. ACCM College makes training easier with our high quality step by step online course materials and the support of a dedicated team of Student Advisers. Our online digital course allows students to complete studies in a flexible way, and our Student Advisers are skilled at transferring their knowledge in an easy and understandable way, making the online course experience a positive one

Entry Requirements

Required Current Work Situation

A warehouse or logistics environment is necessary to be able to undertake practical activities required in this qualification, eg picking products; putaway; inventory stocktake....

It is not possible to undertake this course without access to a worksite that allows you to undertake these activities.

The ability to conduct practical on-the-job assessments in a safe environment under appropriate workplace supervision is also required.

Experience and Qualification Requirements

It is recommended that you have either 6 months experience in a warehouse or logistics role or have completed a relevant Certificate II qualification before starting this Certificate III level qualification.

Literacy Skills

Reading Skills

You must be able to:

Read basic texts relevant to workplace requirements (ie policies and procedures)

Read and evaluate information and ideas to extract meaning relevant to the topic

Use different reading comprehension strategies as needed (ie identifying, questioning, previewing)

As a guide - you should have completed Year 10 schooling, or have proven workplace reading skills.

Writing Skills

You must be able to:

Write clear sequenced instructions for using routine/everyday activities

Draft short emails and letters to convey required information

Complete a range of forms requiring routine and factual data

As a guide - you must have completed Year 10 schooling, or have proven workplace written communication skills.

Language Skills (Spoken English)

You must be able to:

Demonstrate flexibility in spoken language by using the appropriate structure and/or strategy

Extract the key ideas or information from spoken conversations across a range of contexts

Explain complex procedures and give clear sequenced instructions to others in familiar setting

As a basic guide - you must have sufficient English speaking skills to be able to communicate effectively and professionally with your Student Adviser over the phone.

Numeracy Skills

You must be able to:

Interpret, comprehend and use a range of everyday mathematical information in familiar and routine contexts

As a basic guide - you must have completed Year 10 schooling, or have a working knowledge of basic mathematical functions.

Computer and Internet Requirements

You must have:

Access to a Desktop Computer or Laptop; some course work may be completed via mobile devices

Internet access with Internet Explorer 8+, Chrome or Firefox

Microsoft Office 2010 Word (or higher) and Subject specific Microsoft Office products for chosen electives (ie Excel or Powerpoint)

Digital Literacy Skills

You must be able to:

Open and use a computer application (such as your Web Browser)

Navigate a website by following instructions and follow website "links"

Type and edit text eg for short answer assessment questions

Select the appropriate answers in a multiple choice list (select the correct option(s))

Download, save, edit and upload documents or files

Write, edit, send, receive and save emails

Open and use a word processing application (such as Microsoft Word or Google Docs)

Open and use a spreadsheet program (such as Microsoft Excel or Google Sheets) depending on electives chosen

Subject Descriptions

Core Subjects:

Safety and Manual Handling

Safety is paramount in every industry, especially in Warehousing and Logistics. This Subject provides the skills and knowledge required to work in a healthy and safe manner. You will learn to recognise hazards, the importance of safety signs and how to raise safety issues within a warehouse or logistics workplace. This is a great entry level Subject to help you respond to emergency incidents and use manual handling techniques safely.

Note this subject requires live manual handling activities to be undertaken as part of the assessment conditions.

Unit(s):

TLID0020 - Shift materials safely using manual handling methods

TLIF3003 - Implement and monitor work health and safety procedures

TLIF2006 - Apply accident-emergency procedures

Records for Logistics Operations

Modern logistics roles require expertise in a range of computer and business systems. This subject will teach you how to use these systems and manage records ie: setting up, using and shutting down computer-based equipment; and inputting, storing and presenting files/data. It also involves implementing workplace procedures for managing and securing data and warehouse records.

Unit(s):

TLIK2010 - Use infotechnology devices in the workplace

TLIA0016 - Organise warehouse records operations

Work Effectively in the Supply Chain

Working effectively in the Supply Chain requires a thorough understanding of the logistics, store and warehouse environments. This includes a focus on using quality methods and prioritising strategies to ensure customer satisfaction across Supply Chain management. A number of practical workplace activities are undertaken and used as assessment evidence to ensure new employees get started in the right way.

Unit(s):

TLIL0007 - Complete workplace induction procedures

BSBPEF301 - Organise personal work priorities

TLIJ0003 - Apply quality systems

Mid Course Survey

Unit(s):

MID-SURVEY - Mid Course Survey

Chain of Responsibility Obligations

Any person who has some role in the transport and storage of goods (called the Supply Chain) is responsible for safety. This requires having the skills to identify and manage fatigue; determine and calculate load mass; and ensure compliance with vehicle and storage limits. This is a key Subject to ensure you are aware of your legal obligations and practical ways to meet them.

Unit(s):

TLIF0009 - Ensure the safety of transport activities (Chain of Responsibility)

TLIF2010 - Apply fatigue management strategies

Purchasing and Procurement in the Supply Chain

Significant cost savings can be made by managing purchasing effectively and efficiently. This subject provides the skills and knowledge to manage documentation flow in the purchasing process including the confirmation of goods received and despatched as part of daily your Supply Chain operations.

Unit(s):

TLIA0004 - Complete receipt and despatch documentation

BSBPUR301 - Purchase goods and services

Service Skills in Supply Chain Operations

Customer Service is a key function in all Supply Chain job roles. This Subject will deliver the skills needed to identify internal customers needs and deliver strong customer service. This includes practical service skills with emphasis on customers with special needs, working in a culturally diverse workplace and effective complaint handling skills.

Unit(s):

BSBOPS304 - Deliver and monitor a service to customers

Sustainability in Logistics

Environmental sustainability is everyone's responsibility. This Subject explains what sustainable practices are and how you can follow them in your workplace. Content includes recycling programs and ways to monitor usage of business resources so you can identify money saving practices to benefit your business.

Unit(s):

TLIU2012 - Participate in environmentally sustainable work practices

Consolidate Manifests

Accurate manifests are critical to Supply Chain operations. This Subject will provide the ability to consolidate manifest documentation in accordance with relevant freight codes of practice and regulations. It includes identifying and processing documentation per workplace procedures to ensure proper shipment.

Unit(s):

TLIE0003 - Consolidate manifest documentation

Service Guarantees

Quality Training Provider

ACCM has a history of satisfied students and clients and repeat business. Our testimonials on our website are genuine and the type of feedback we receive daily. We are so confident that you will be pleased with the College service, that we guarantee it.

Speedy Paper-less Enrolment

Enrolment Applications are accepted 24/7 online. Be fully enrolled in your course in 7 minutes! For customised or employment based courses and traineeships contact us and we will send you a customised enrolment page by email.

Start Anytime - Immediate Enrolment

Within 30 minutes of applying to enrol, your personal log-on details are emailed to you. This gives you access to our on-line system Webclass. Login to Webclass and complete the administrative items. Once you have completed these items a College Student Adviser will phone you to discuss your needs, course requirements, suitability and electives. You will then have access to the first study module via WebClass.

Industry Expert Student Adviser

You will be allocated your own industry experienced Student Adviser. While they will personally manage your program; you will also benefit from the College team around them to provide expert assistance in all subject areas.

Prompt Results and Feedback

All assessments are promptly returned (via Webclass) with detailed feedback and encouragement. Our goal is to have them back to you in a week or less. In the meantime you can progress to your next subject.

Personal Contact for the Right Start

Your College Student Adviser will phone you to welcome you to the course and ensure that you understand the best way to make progress in your course. They will also assist you with any questions you may have.

They will be in regular contact with you, especially at the start of your course, to offer motivation, support and guidance.

For employment based enrolments they will also make contact with your work supervisors to address any questions they may have.

Pro-active Learner Support

The support won't stop! Contact from your College Student Adviser will continue every month, based on the level of help you need.

Of course, at any time you can call us to get help. Get immediate assistance over the phone and by email. If immediate assistance is unavailable for any reason, we will make sure a qualified Student Adviser is in contact with you no later than the next business day.

Quality Course Materials

Our step by step course materials have been written by industry experts specifically for the College. They will give you all of the relevant learner information you need to succeed in your course.

The resources simplify industry jargon and concepts, give you industry insight and understanding, and focus on current real world business practices.

Employer Progress Updates

For employment based enrolments all supervisors will have access to an online progress report showing the current status of all learners. We understand that it's essential to keep you up to date so we will prompt you each month to access your report.
